Subject: RE: NPDES Permit Contractor Support Status Update Meeting
Attachments: CA NPDES Permit Status Tracking (9-3-19).xlsx

Hi all,

PK and I were the only ones on the call today, so I wanted to send out a brief status update. I noticed in responding to the calendar appointment that I need to replace Armando with Gur's email, so I will do that shortly.

The period of performance on Task Order 9 ended August 31st. All work under the task order was completed.

The period of performance on Task Order 417 ends September 23rd. We are still in progress on Humboldt Creamery, the Low Threat Discharge General Permit, the Santa Rosa RPA update, and the Santa Susana Field Laboratory, but we expect to deliver everything by September 23rd.

We received the performance work statement (PWS) for Option Year 1 for Task Order 417, which includes support for eight permits (seven Group I permits and one Group III permit). The period of performance is September 24, 2019 through September 23, 2020. We are looking forward to the opportunity to provide continued support!

The PWS also includes support for ICIS coding of 25 permits. I noted during the call that 15 permits have already been identified as needing coding under the new option year. Once these are coded, we'll have the capacity to code 10 additional permits, which might be completed as early as November 2019.
